TIRE PRESSURE MONITOR SYSTEM REGULATIONS

The Federal Government has mandated that as of September, 2007, all passenger vehicles under 10,000 lbs & manufactured in the USA must be equipped with a tire pressure monitoring system.

WHY BUY A TPM SENSOR ACTIVATION TOOL ?

- **Check TPM Sensors to Make Sure They are Working** - Don't pay for a sensor that was broken before it arrived in the shop
 - **Reprogram Sensors When Tires are Rotated** - The vehicle's computer must be told when a tire position is changed
- TPM Sensors can be checked & reprogramed without this tool by reducing the air pressure in each tire
However, this tool completes the job quickly & easily - Time is Money !

WHY BUY THE BARTEC TPM TOOL ?

- Activates all known sensor protocols
(FYI : Some vehicles require an OEM tool to reprogram or replace sensors)
- Has software update capabilities via the internet - No need to wait for a CD

TECH 400 + \$1,475
