TIRE PRESSURE MONITOR SYSTEM TOOL

Effective Date: 04/01/09

TIRE PRESSURE MONITOR SYSTEM REGULATIONS

The Federal Government has mandated that as of September, 2007, all passenger vehicles under 10,000 lbs & manufactured in the USA must be equipped with a tire pressure monitoring system.

WHY BUY A TPM SENSOR ACTIVATION TOOL ?

- * Check TPM Sensors to Make Sure They are Working - Don't pay for a sensor that was broken before it arrived in the shop
 - * Reprogram Sensors When Tires are Rotated - The vehicle's computer must be told when a tire position is changed
- TPM Sensors can be checked & reprogrammed without this tool by reducing the air pressure in each tire
However, this tool completes the job quickly & easily - Time is Money !

WHY BUY THE BARTEC TPM TOOL ?

- * Activates All Known Sensor Protocols - (FYI : Some Vehicles Require an OEM Tool to Reprogram or Replace Sensors)
- * Has Software Update Capabilities via the Internet - Updates Can be Done Immediately Upon Release
